Pricing Statistical Analyst/Data Scientist

City	Atlanta	**Employment Type**	Experienced Professionals
Department	Accounting/Finance	**Requisition ID**	2015-1868

Opportunity Details:

Overview:

Who are we looking for?

- Are you a thinker with a passion for solving complex business problems?
- Are you a detail oriented person that likes working with data and looking for patterns?
- Are you a researcher, who loves to ask questions and investigate?
- Are you a good communicator capable of transforming numbers into knowledge and action?

Who are we?

We are the Business Insights department at Chick-fil-A. We generate insights by analyzing information and business knowledge to help the organization better understand the past, envision the future, and steward our financial and human resources in the best way possible. We do all this while being great team players and having fun in all that we do.

What is the role all about?

If you are passionate about data, statistics, and playing a vital part in influencing pricing strategies to over 1800 Chick-fil-A franchised restaurants then this position is for you! The mission of this position requires a multidisciplinary blend of statistics, technology, and business strategy, all applied in tandem to discover key insights that lie hidden in our data sets.

Responsibilities:

- Analyze quantitative data and qualitative research to better understand costs, competitors and customers.
- Understand and apply data mining techniques to generate deep insight and discover effective solutions to pricing strategies
- Support strategic decisions of Pricing Council.
- Support implementation of price increases as needed through the development of pricing models
- Provide forecasting support to the pricing team and the Business Insights department.
- Provide modeling and optimization support to the pricing team and Business Insights department.
- You will work with a team of individuals who will be highly committed to your success.
- You will gain great experience delivering analytical insights about current and forecasted profitability of our restaurants.
- You will gain great exposure to the business and to our Operator community.
- Your work will have a positive impact on the income of Chick-fil-A Operators all over the chain.
- You will be working for one of the best companies in Atlanta.
- You will make some good friends and have lots of fun along the way.

Minimum Qualifications:

- Strong academic track record / 3.2 GPA
- Master's degree in Finance, Business, Statistics, Engineering or another quantitative or technical discipline
- 3-5 years of experience in analytics and or pricing (restaurant industry preferred)
- Strong analytical skills with experience in analyzing large data sets
- Experience with SAS, SPSS, or R (SAS preferred)
- Excellent oral and written communication skills
- Ability to learn things quickly and work independently
- Analytical, creative, and innovative approach to solving difficult problems

Minimum Years of Experience:

3

Travel Requirements:

0%
