

**Research Statistician**  
**The Ohio State University, Division of Hematology**  
**Columbus, Ohio**

**April 16, 2015**

The Division of Hematology at Ohio State's James Cancer Hospital and Solove Research Institute is seeking an experienced biostatistician to join its medical research program. This non-academic position will:

- consult and collaborate in multiple, assigned research projects in a multi-disciplinary team environment
- coordinate, conduct, and interpret analyses of biomedical research projects using descriptive statistics, basic inferential tests, and advanced statistical modeling procedures
- describe results with tables, graphs, and in oral and written form in a manner in which non-statistical collaborators can understand
- write programs using statistical software which may include developing special statistical programs for which no packaged software exists
- assist in preparation of journal articles, technical reports, and grant submissions

Education and experience for this position include:

- Master's degree in biostatistics or statistics or equivalent education/experience
- at least 2 years of applicable work experience
- proficiency with statistical software (SAS and/or S-plus/R and/or STATA)
- experience working with large datasets
- excellent written/oral communication skills
- experience with medical research preferred

The Division of Hematology is an academic unit within the Department of Internal Medicine. The major focus is in performing transforming research that translates basic findings to the bedside where new therapies are applied for the treatment of benign and malignant blood cancers. Additionally, the Division of Hematology is pro-active in the introduction of novel treatment approaches in blood and bone marrow transplantation with national leadership in both the Alliance for Clinical Trials in Oncology and the Experimental Therapeutics Clinical Trials Network (ETCTN). For more information about the Division, please visit <https://internalmedicine.osu.edu/hematology/>.

For any questions regarding this position, please email [hematology@osumc.edu](mailto:hematology@osumc.edu).

A curriculum vita is required to be submitted as part of the online application at <http://wexnermedical.osu.edu/careers> (Job Opening ID 407268).
