

Open Rank Faculty Position in Biostatistics

The section of Clinical Statistics at Mayo Clinic is seeking motivated and talented Biostatistics Faculty.

The Section of Clinical Statistics, which is housed in the vibrant Department of Health Sciences Research, Division of Biomedical Statistics and Informatics, is seeking motivated and talented biostatisticians looking to establish successful careers in a collaborative research environment or more senior investigators seeking opportunities to further develop leadership skills within the field. A variety of teaching opportunities exist through Mayo Clinic's Center for Clinical and Translational Sciences (CCaTS). Methodological research and visibility within the field of biostatistics is expected; however, the primary measures of success are more closely aligned with a successful and productive collaborative research career.

Successful candidates will have a Ph.D. in biostatistics or closely related field and at least one year post graduate experience. Individuals with demonstrated collaboration success are encouraged to apply. Clinical trial, comparative effectiveness research, or modern statistical and machine learning techniques expertise is desirable. Successful candidates will be expected to lead a team of allied health (BS and MS-trained statisticians and programmers) and interact with collaborators across a broad spectrum of clinical and translational research.

MAYO CLINIC is a premier academic medical center with over 3,800 staff physicians and scientists in a unified multi-campus system spread across Arizona, Florida and Minnesota. This unique environment brings together the best in patient care, groundbreaking research and innovative medical education. Mayo Clinic offers a highly competitive compensation package with sustained intramural funding, outstanding laboratory facilities, capital equipment funding, technical and computational resources, and exceptional benefits.
