December 12, 2014

Dear Colleague:

The University of Pittsburgh is a major research university that ranks among the top public universities both nationally and internationally. The Statistics Department here is a vibrant one which is undergoing considerable change, with three new hires in the last four years. Our faculty are engaged in research in multivariate analysis, computational neuroscience, functional data analysis, shape analysis, and time series analysis. We have long-standing collaborations with our School of Medicine, and are well placed for collaborations with other departments in the School of Arts and Sciences and Engineering. We seek strong candidates who will complement our young faculty. Please circulate this letter and attached notice to your graduating PhDs and post-doctoral fellows. Thank you.

Sincerely,

A handwritten signature in blue ink, appearing to read "Satish Iyengar".

Satish Iyengar  
Professor and Chair

**TENURE-TRACK ASSISTANT PROFESSOR POSITION**  
**Department of Statistics**  
**University of Pittsburgh**

The Department of Statistics at the University of Pittsburgh invites applications for one tenure-track Assistant Professor position starting September 2015, pending budgetary approval.

This position involves teaching, statistical research, and collaboration with investigators outside of statistics. Strong preference will be given for research in computationally intensive methods, but any area of statistics will be considered.

Send CV, transcripts, and three recommendation letters to *statfac@pitt.edu*. Applications received by January 15, 2015 will get full consideration.

The University of Pittsburgh is an Affirmative Action, Equal Opportunity Employer. Women and members of minority groups under-represented in academia are especially encouraged to apply.
